

Stop buying AI software.

Start buying AI outcomes.

AI that **engages**, **shows**, and **resolves** — across inbound and outbound interactions, fully managed and enterprise compliant.

2026

§ 01 / THE THESIS

The era of AI **tools** is over. The era of AI *outcomes* has begun.

§ 02 / TWO DIRECTIONS, ONE PLATFORM

INBOUND · ↘

01

Deflect & resolve.

Incoming calls are deflected from live agents to AI self-service. Customers resolve faster — without ever reaching a queue.

75%+

CONTAINMENT
RATE

OUTBOUND · ↗

02

Engage & convert.

Customers are proactively engaged through fully automated, multi-touch campaigns across voice, text, and email — orchestrated to lift response rates.

MONTH

§ 03 / WHAT MAKES US DIFFERENT

One agent. *Two channels at once.*

At the core of Zappix is a branded multimodal AI agent — the only solution that engages customers across voice and visual interfaces simultaneously, in real time.

A customer calls. Instead of a phone tree, they're in a natural conversation with AI that understands them — while a visual interface on their phone shows guided steps, confirmations, and live options in lock-step with the call.

01

Engage.

LLM-trained conversational support by voice or chat.

02

Show.

Branded Multimodal Visual Interface delivers visualized information and digital actions.

03

Resolve.

End-to-end. Full containment. Or seamless agent handoff when needed.

§ 04 / THE PLATFORM

One platform. *Three products.*

OUTBOUND01

Intelligent Outreach

Orchestrated, multi-touch campaigns across voice, text, and email – improving response rates and eliminating manual outreach effort.

VOICE CAMPAIGNS

SMS SEQUENCES

EMAIL ORCHESTRATION

INBOUND02

AI Self-Service

Multimodal LLM-powered conversational AI combined with Visual IVR for a simultaneous, real-time voice and visual journey.
